

ATS1330

ATS Power Distribution Board

OVERVIEW

The Power Distribution Board, model ATS1330, provides a simple means of star connecting Axon-bus devices. It is fitted with a single protected input port and five paralleled output ports, providing either the traditional power and comms or power alone. It is a standard board size and provides a power OK LED for easy diagnosis.

FEATURES

- Provides a simple means of star connecting
- Fitted with a single protected input port and five paralleled output ports
- Traditional power and comms or power alone.
- Provides a power OK LED for easy diagnosis
